TREND SETTERS:

Reshaping EMS

As with most changes introduced to EMS, particularly the introduction of new technology, there are often questions and some degree of skepticism, with naysayers asking, "Why do we need it now when we've done just fine without it in the past?"

The reality is that in the short, 40-year history of modern EMS, we've experienced numerous changes in the education of our personnel and the refinement of the equipment deployed in the field.

—A.J. Heightman, JEMS, March 2009

COURSE OBJECTIVES

This 2.5-hour outreach course is designed to provide an overview on the following trend-setting innovations:

- SpCO/Pulse CO-Oximetry—Where there's carbon monoxide (CO), there's not always fire
- SpMet/Methemoglobin Monitoring—What Is Methemoglobinemia?
- End Tidal Carbon Dioxide Monitoring/EtCO2 and Universal Capnography
- Getting the Trend—Maximizing the potential of pre-hospital 12-lead ECG

This course is designed for all levels.

LOCATION

This course is designed to be taken "on the road" to you and is available at community sites as requested.

COST

There is no cost for this course. However, a minimum of 15 attendees is required.

WHAT DOES DEACONESS PROVIDE?

- Course materials
- Faculty
- Course presentation
- Certificates of completion (upon request)
- Course promotional materials

WHAT DOES YOUR ORGANIZATION PROVIDE?

- A minimum of 15 attendees
- Classroom space
- Refreshments
- Distribution of course promotional materials
- Audio visual (if available)

COURSE COORDINATOR

Kevin Hendrickson, RN, CCEMTP
