# PEDIATRIC PREDICAMENTS

## COURSE DESCRIPTION

The Pediatric Predicaments course is a 2.5-hour program designed to serve as both a review and an opportunity for learning new approaches to many of the pediatric problems faced in the pre-hospital or emergency department setting.

This course is designed for all levels—RNs, NPs, PAs.

## COURSE TOPICS

This course can be tailored to fit the needs of your service. Among the potential topics are:

- Preparing an organized approach to the pediatric emergency patient and pediatric patient assessment
- Answering quickly two questions: How sick is the patient physiologically, and how quickly is intervention needed?
- Busting the most common myths about pediatric fever
- Examining the developmental stages of children and their communication abilities and offering suggestions about how to most effectively communicate with children verbally and non-verbally

## LOCATION

The Pediatric Predicaments course is designed to be taken “on the road” to you and is available at community sites as requested.

## COST

There is no cost for this course. However, a minimum of 15 attendees is required.

## COURSE COORDINATOR

Kevin Hendrickson, RN, CCEMTP

## WHAT DOES YOUR ORGANIZATION PROVIDE?

- A minimum of 15 attendees
