

Do you have concerns about your out of pocket portion for your remdesivir (Veklury®) therapy?

The maker of Veklury® has two programs available to help you with cost of the medication:

- Copay Coupon Program for commercially insured, eligible patients
- Patient Assistance Program – free product support for uninsured/under-insured eligible patients

The Deaconess Medication Assistance program will assist you with completing the application for assistance for the remdesivir (Veklury®) therapy.

Please notify the infusion nurse if you would like a copy of the application to review and sign while you are here or you may call the Deaconess Medication Assistance Program at **812-450-2319** later for more information or help with completing the application after you have looked at the information.

The process for approval may take several days and you will be notified by a Medication Assistance Coordinator regarding the approval or denial of your application once returned from the maker of Veklury®.
